

TROY LATTER

Technology Manager - AI Platforms & Operations

Enterprise AI Technology Executive

Sydney, Australia | +61 424 882 136 | troy.latter@gmail.com
linkedin.com/in/theinnovater | Previously held AGSVA NV2 security clearance

EXECUTIVE PROFILE

Enterprise AI and technology executive with more than 20 years' experience leading engineering capability, enterprise architecture, platform strategy and large-scale transformation across government, defence, critical infrastructure and global enterprise environments throughout Australia and Asia-Pacific.

Builds organisational AI capability rather than isolated technology projects - setting technology direction, shaping product and platform roadmaps, leading multidisciplinary technical teams, governing risk, strengthening service maturity and guiding proof-of-concept to enterprise-scale decisions.

Combines practical experience across Microsoft and AWS ecosystems with deep expertise in Responsible AI, cybersecurity, privacy, enterprise risk, service management and organisational change. Trusted by CIOs, senior executives and public-sector leaders to translate emerging technology into secure, scalable and supportable enterprise capability.

EXECUTIVE IMPACT

- Led regional technology strategy and a solutions engineering capability of 15+ across six countries at Unisys.
- Advised 50+ CIOs and technology leaders across Australia and ASEAN on cloud modernisation, AI/ML adoption, resilience and enterprise platform strategy.
- Influenced more than \$100M in opportunity pipeline at AWS and a \$60M+ regional pipeline at Unisys through technical leadership, executive engagement and reusable solution assets.
- Directed and advised complex programs spanning Defence, Home Affairs, Finance, health, transport, telecommunications and critical infrastructure.
- Supported national-scale initiatives including Cross River Rail, disaster-recovery and COVID-response architectures, immigration and identity transformation, smart infrastructure and secure Defence services.
- Contributed to AI and emerging-technology governance through Standards Australia and the Queensland Government AI Hub.

ENTERPRISE AI LEADERSHIP

Engineering Leadership

Regional solutions engineering | Multidisciplinary technical teams | Architecture leadership | Engineering standards | Capability development | Vendor and delivery-partner leadership | Resource and capacity planning

AI Product and Platform Strategy

AI portfolio roadmaps | Platform evolution | Product partnership | Proof-of-concept to scale | Investment prioritisation | Technology lifecycle | Enterprise integration | Multi-cloud strategy

AI Platforms and Integration

Azure AI | Azure OpenAI | Microsoft Copilot | Power Platform | AWS AI/ML | AWS Bedrock familiarity | SageMaker | API Management | Data and integration services

AI Operations and Service Maturity

GenAIOps and LLMOps operating models | Observability | Model and service lifecycle management | Operational monitoring | SLAs/SLOs | Incident and problem management | Capacity planning | Continuous improvement

Governance and Risk

Responsible AI | AI assurance | Privacy | Cybersecurity | Enterprise risk | Architecture governance | Data governance | Standards development | Ethical technology adoption

Future Direction and Executive Leadership

Technology strategy | Strategic foresight | Portfolio governance | Executive advisory | Investment planning | Stakeholder leadership | Organisational capability uplift | Change leadership

PROFESSIONAL EXPERIENCE

Founder and Principal - Tech 4 Humanity

Mar 2025 - Present | Sydney, Australia

- Established a portfolio focused on human-centred AI, enterprise automation, governance and responsible technology adoption.
- Defined product and platform roadmaps spanning AI orchestration, consent, organisational capability, workforce augmentation and trusted data use.
- Directed design and development across multi-agent, cloud, SaaS and API-based environments, coordinating architecture, product, integration, automation and governance workstreams.
- Embedded auditability, human escalation, provenance, consent, runtime controls and policy alignment into AI system design.
- Evaluated emerging tools, orchestration patterns and integration approaches to guide product priorities, architecture decisions and future investment.
- Advised leaders across education, aged care, transport and public-sector environments on AI adoption, operating models and technology direction.

APAC CTO and Head of Strategic Foresight - Unisys

Jan 2024 - Mar 2025 | Sydney, Australia

- Led regional technology strategy and a solutions engineering capability of 15+ across six countries, supporting government, financial services, telecommunications and critical-infrastructure clients.
- Set future technology direction through horizon scanning, platform evaluation and strategic foresight across Microsoft, AWS, Google and IBM ecosystems.
- Built repeatable technical playbooks, solution patterns and executive briefing assets to improve engineering consistency, delivery readiness and sales-cycle velocity.
- Shaped AI, cloud and service-transformation roadmaps, partnering across product, architecture, sales and delivery to prioritise platform capability, investment and customer outcomes.
- Directed secure LLM and agentic AI pilots for procurement, quoting, compliance and service workflows, moving use cases from early experimentation toward governed enterprise deployment.
- Established governance approaches covering explainability, privacy, cybersecurity, orchestration controls and operational supportability.
- Advised CIOs and executive teams on AI opportunities, architecture options, investment trade-offs, risk and long-term technology direction.
- Influenced a \$60M+ regional pipeline through technical leadership, executive engagement and reusable solution assets.

Principal Solutions Architect and Global Capability Adviser - Amazon Web Services

Dec 2019 - May 2023 | Sydney, Australia

- Advised 50+ CIOs and technology leaders across Australia and ASEAN on cloud modernisation, AI/ML adoption, resilience and enterprise platform strategy.
- Led cross-functional technical teams through architecture reviews, discovery, solution validation, implementation planning and executive decision support.
- Delivered more than 100 executive briefings, architecture sessions and technical workshops, strengthening capability across customer, partner and internal teams.
- Shaped cloud, data and AI/ML roadmaps using AWS services, serverless architectures and enterprise integration patterns.
- Partnered with executives, architects and delivery teams to assess proof-of-value initiatives and determine scale, security, resilience and operational readiness.
- Defined secure and resilient architecture patterns for large-scale digital, data and AI/ML environments using AWS operational-excellence and reliability principles.
- Supported Cross River Rail digital-twin and spatial-computing initiatives, national and regional disaster-recovery programs, and COVID-response architectures.
- Developed partner motions with Oracle, Microsoft and NVIDIA and influenced more than \$100M in opportunity pipeline.

Innovation Adviser and Cloud Architect - Oracle

Jul 2016 - Sep 2019 | Canberra and APAC

- Served as a trusted technology adviser to government and national CIO stakeholders across Australia and Southeast Asia.
- Shaped secure cloud, AI, data and digital-infrastructure roadmaps for immigration, identity, health, national-security and smart-infrastructure programs.
- Led architecture definition across secure, hybrid and bandwidth-constrained environments, balancing innovation with sovereignty, cybersecurity and service continuity.

- Coordinated technology, policy, procurement and implementation stakeholders across complex multi-jurisdictional programs.
- Supported visa transformation spanning 200+ systems and 15 agencies, a Malaysian healthcare network of 150+ clinics, Singapore smart-infrastructure initiatives and a Philippines cyber-command program.
- Evaluated technology options and sequencing to improve supportability, reduce delivery risk and guide long-term investment.
- Contributed to strategic pursuits exceeding \$100M.

Business Value Consultant - Hewlett Packard Enterprise

Jan 2013 - Jun 2016 | Canberra, Australia

- Led business-value, architecture, service-management and transformation work across Defence, Finance and Human Services.
- Supported a \$250M secure content collaboration and search program, aligning technology, service management, operational readiness and organisational adoption.
- Applied ITIL, IT4IT, SIAM and ServiceNow practices to improve service governance, integration and operational maturity.
- Supported incident, problem, service-transition and continuous-improvement disciplines across complex enterprise environments.
- Co-developed business cases, investment models, architecture roadmaps and change strategies for major public-sector programs.
- Advised senior executives on operational readiness, benefit realisation, service risk and transition into sustainable operations.

Senior Consultant and Change Lead - SMS Management & Technology / Canberra Consulting

2010 - 2013 | Canberra, Australia

- Led program, PMO, business analysis and organisational-change functions across large Australian Government transformations.
- Directed global change activities spanning 65 countries for immigration and visa-service reform.
- Supported Digital Identity, Tell Us Once, Voice Biometrics, enterprise-data and service-integration initiatives.
- Built stakeholder alignment, operating models, adoption strategies, governance and delivery controls across multi-agency programs.

EARLIER LEADERSHIP ROLES

Defence Housing Australia - National Program Manager, Sales and Partnerships

Led national program, commercial, partner and organisational-change responsibilities across a complex stakeholder environment.

ActewAGL / TransACT - Strategy and Acquisition Manager

Led strategy, acquisition and organisational-alignment initiatives supporting rapid customer growth.

SELECTED ENTERPRISE AI AND PLATFORM LEADERSHIP

- Pilot to scale: Evaluated AI tools and pilots across Microsoft, AWS, Google, IBM and Oracle ecosystems, guiding decisions on strategic fit, architecture, risk, operational supportability and investment.
- Governance by design: Developed trust-oriented patterns covering logging, audit trails, human escalation, provenance, freshness, consent and policy compliance.
- Product and architecture partnership: Worked across product, enterprise architecture, engineering and delivery to convert strategic priorities into sequenced, supportable technology roadmaps.
- Operational maturity: Applied service-management, reliability, incident/problem, lifecycle and continuous-improvement disciplines to complex technology environments.
- Capability uplift: Led executive briefings, architecture workshops, mentoring and adoption programs that translated complex AI and cloud concepts into actionable organisational roadmaps.

GOVERNANCE AND PUBLIC LEADERSHIP

- Committee Member - Standards Australia, Brain-Computer Interface and Robotics
- Advisory Board Member - Queensland Government AI Hub
- Former Board Member - ITSMF Australia

EDUCATION AND CREDENTIALS

- Master of Commerce (Marketing) - University of New South Wales
- Bachelor of Economics (Law / Industrial Relations) - University of Wollongong

- AWS Certified Solutions Architect - Professional
- PRINCE2 Practitioner
- Prosci ADKAR Change Management
- ITIL v3 | TOGAF Foundation | IT4IT Foundation
- Cloud and AI platform micro-credentials across AWS, Microsoft Azure, Google Cloud and Oracle

TECHNOLOGY PORTFOLIO

AI and Generative AI: Azure AI, Azure OpenAI, Microsoft Copilot, AWS AI/ML, AWS Bedrock familiarity, SageMaker, Google Cloud AI, Oracle AI, LLM orchestration, agentic systems, multimodal AI, RAG, model evaluation and guardrails

Cloud and Platforms: AWS, Microsoft Azure, Google Cloud, Oracle Cloud, Salesforce, ServiceNow, Snowflake, Databricks and Power Platform

Architecture and Integration: Enterprise architecture, API Management, REST APIs, integration patterns, serverless, microservices, data platforms, identity and security architecture

Operations and Governance: GenAIOps and LLMOps operating models, observability, service management, SLAs/SLOs, incident and problem management, capacity planning, Responsible AI, privacy, cybersecurity and enterprise risk
